

## Crystal Meth Auto

The Most Consciousness-Expanding Strain on The Market.

- **Beautifully purple.** Expect a variety of deep purple colors as soon as the buds start forming.
- **One and only flavors.** A unique terpene mix resulting in nutty flavors, a truly special combination.
- **Full-on Sativa high.** An intense head rush that will hit you quick, great for those looking for strong Sativa trips.
- **One of our first creations!** This Sativa-dominant hybrid is the result of years and years of selective breeding.
- **The best of both worlds.** Expect a plant with an Indica-like structure that delivers strong Sativa effects.

One of FastBuds first creations, Crystal Meth is a psychedelic strain, unique to its kin. Years of selective breeding led to create this Sativa leaning hybrid; an aesthetically pleasing powerhouse of production, delivering potent uplifting highs, (that are almost hallucinatory), great for listening to music, or watching your favorite movies.

### Bud description

Deep purple bodied and crystal varnished rocks, lit up by the dotted patches of bright orange pistils covering it, make it really the unique strain it is.

### Smoke report

A full-on Sativa leaning strain. You can expect a quick-hitting cerebral rush that slowly pans out into a more mellow state of being. Great for daytime smoking, and definitely won't leave you couch-locked. A great strain for anyone looking for a sweet Sativa trip.

### Plant Appearance

An easy-going plant, growing anywhere between 70 cm to 120 cm in height, and despite its mainly Sativa effects, it'll take an Indica-like structure, growing compact and stocky. Developing multiple chunky bud sites and one main cola on top, things get really interesting around week 5 as the plant starts to boast its wide variety of rich purple colors.

### Grow Tips

Crystal Meth is a robust plant that requires light feeding and adjusts nicely to indoor and outdoor growing. Be careful to maintain proper pH levels and go light-handed on the nitrogen as she can be a bit sensitive, especially during flowering, and won't be afraid to show you if something's wrong.

### Flavor

A uniquely flavored strain that combines pine-like scents, with earthy nutty flavors. The overall earthiness of the strain is somewhat undermined by a lighter touch of flavors giving the strain a quite unique Hazelnut like taste, very distinguished and special.
